

GDMX is launching a multi exchange consolidated/aggregated trading platform that, upon completion, will allow is users to trade multiple exchanges under one platform. A robust, stable, technically superior platform that will allow institutions and individual traders alike, to trade the cryptocurrency market with best price execution and market depth.

The founding team is completely based out of United States and consists of five business professionals combined with over 60 years of financial experience. The development team is based out of Ukraine with tremendous experience in developing trading and financial applications. GDMX has also enlisted a number of advisors with various financial and technology backgrounds to enhance this project.

Our goal is to build a full service trading infrastructure and to create an independent multifaceted ecosystem that will streamline three major components of the digital economy:

A liquidity provider, a trading platform, and a complete API framework.

The most important components are:

- A scalable Order Management and Matching system
- One unified factory standard API as .NET and FIX for all players
- Large liquidity pool, based on order books from all connected exchanges
- Relay gateways for Level1 and Level2 fastest data books
- Lowest service fees
- Reliable and familiar deployment methods for large institutions

Furthermore, our goal is to also create an independent marketplace with a smart contract depository, which records all trading and non-trading transactions in blockchain. It is designed to become a single standardized system for monitoring and resolving disputes between the trader and the broker, and to eliminate the possibility of misuse of client funds.

GDMX tokens – are at the core of all transactions made in the GDMX project. No payment can be conducted without the GDMX token. Its main goal, regulated by smart-contract, is to stimulate token holders to use GDMX in their daily platform usage, and to attract new users to our platform. The only issuance of GDMX tokens will be during the ICO, which is also the presale of GDMX services usage opportunity. GDMX is planning to list its tokens on crypto currency exchanges to increase its user base and provide the most comprehensive services.

Based on our thorough research and projections that GDMX will capture between 2% to 2.5% of market share in the next five years, we are looking at the following revenue projections:

First year of operations 2019 we are projecting to receive revenues of \$32,467,070.24 from execution and software fees. Second year projections are \$43,830,544.82, third year \$54,788,181.03, fourth year \$65,745,817.24 and fifth year \$72,320,398.96. (for details refer to GMDX white paper pages 26-29)

GDMX is projecting to launch an Initial Coin Offering with Pre-Token thru a Private round starting on July 1, 2018 at 12:01:00, proceeded by 10 Day period. The token will be priced at \$.0.25 per each GDMX token.

Phases	Discount	Discount Price	Token Amount
Pre-ICO Private Sale	60%	\$0.10	10,800,000
Pre-ICO	40%	\$0.15	18,000,000
ICO Day 1	20%	\$0.20	36,000,000
ICO Day 2-14	15%	\$0.21	52,200,000
ICO Day 15-30	10%	\$0.23	45,000,000
ICO Day 31-45	0%	\$0.25	18,000,000
Total Tokens GDMX:	400,000,000		
Total issued:	180,000,000		
ICO HARD CAP:	36,697,500
